

# Hide a student's grade from other class members

Last Modified on 10/09/2018 2:16 pm EDT

When a student checks his or her grades on Moodle, only their grades should be seen. To reduce the risk of students being able to guess the grades of their classmates, instructors have the ability to hide the ranks on the user report. It is recommended that the rank and the average be hidden by having the settings on “Hide”. See image below.
