

Accessing Outlook Mail with the Mail App

Last Modified on 03/11/2020 7:35 pm EDT

Mail App

The Mail app allows for you to have your Outlook, Gmail, and more in one area. When syncing your Outlook email, the mail app will search to verify the accuracy of this. Once done, you may email, schedule events, set tasks, etc using this app. Events created in this app will appear on other outlook sources.

NOTE: The app does not currently allow one to create a Teams Meeting.
