

REPLACING COURSE CONTENT

Last Modified on 03/22/2020 1:56 pm EDT

NOTE: Replacing course content should ONLY be done for courses that you are working on in between semesters. For example, let's say you've decided that you are working on a course for the upcoming semester and you put content in that shell that you later decide you don't need OR you import the wrong course into your shell.

You can back up the course that you actually want to place in the new shell and then RESTORE that course into the new shell, wiping out all of the previous content in the new shell. When doing this, it is important to ensure that you have not removed the enrollments.

See video below.
