

Sort the Moodle Gradebook Using Groups

Last Modified on 08/20/2020 11:25 pm EDT

When teaching a course with multiple sections, especially when a course has a large number of students, using groups in conjunction with the gradebook makes it much easier to filter student data. Multi-section courses automatically have groups created for each section, which you can use in addition to, or instead of, your own custom groups.

View Grades for Specific Groups or Sections

To view grades for specific groups or sections in your course:

1. [Create and Edit Groups and Groupings in Moodle](#)
 2. [Enable Group Mode in Your Course or Course Activity](#)
 3. Open the Grader Report. Either
 - Navigation Block > My Courses > Select Course > Grades; or
 - Administration Block > Course Administration > Gradebook Setup > View tab > Grader Report
 4. Above the All Participants Header, use the dropdown box to select group to view in gradebook.
-
