

Give Students a Running Total of Their Letter Grade

Last Modified on 11/09/2021 5:34 pm EST

Students appreciate the ability to see a current, up-to-date letter grade and know their progress in a course. The Moodle gradebook can do this by incorporating the Exclude Empty Grades function. Exclude Empty Grades is a category setting for the full course level category and any sub-category (i.e. Quizzes, Homework).

Exclude Empty Grades means activities without scores will NOT be counted in the course total or an individual category total. Only activities with real scores will be used to calculate the student's current progress, expressed in a percentage value.

Letter Grades in Moodle (To be Updated Soon)
